Post-Harvest Technology Unit

The Post-harvest Technology Unit is committed to helping farmers, retailers, packhouse operators, distributors and exporters to reduce post-harvest losses of perishable agricultural commodities entering commerce. These commodities include fruits, vegetables, root crops and ornamentals. The unit provides:

- Research – primarily aimed at reducing qualitative and quantitative post harvest losses and extending the storage life of fresh produce entering commerce.

- Technical consultation on problems experienced in the fresh produce industry.

- Training in post harvest handling techniques, post-harvest treatments and application, packhouse design and operations and sensory evaluations

I/We am/are interested in training in:

- Harvest, handling, packaging, storage
 Packhouse design
 Sensory evaluation
 Minimally processed fruits and vegetables

Please list the crop(s) of interest

Name _____
 Address _____

 Phone _____

I/We am/are interested in research/consultation on:

- Reducing losses/increasing storage life
 Troubleshooting
 Minimal processed fruits and vegetables
